

What happens when we arrive at your property.....

- We can discuss your ideas and needs for photographing your property before we take any pictures
- We will set up the camera and mast in minutes
- You can join us in our custom built office and view live time images streamed down to the laptop
- Some properties may require pictures taken from different angles, unlike others we do not charge for extra set ups
- Amount of pictures taken can vary with properties, as we take pictures at varying heights, angles and optical zooms
- All pictures taken are written onto CD on location

A mast photography session usually includes a preliminary assessment of the site, a number of set ups to achieve the best photographs possible and different views, image transfer onto CD and A4 printing of your picture of preference (depending on which package you select)

We have packages available to suit everyone's needs, please enquire to find out more
